

Frontend Interview Kit

End-to-end prep kit for frontend interviews covering coding, architecture, and communication.
Type: Interview-kit **Read time:** 12 min read **Level:** Intermediate to Advanced **Tags:** Frontend, React, System Design

Round-wise preparation strategy

Round 1: Coding and fundamentals

- JavaScript closures, promises, event loop
- DOM and browser rendering basics
- Problem solving with arrays, strings, and trees

Round 2: Frontend system design

- Build low-level component APIs
- Optimize re-renders and state updates
- Discuss pagination, caching, and error handling

Round 3: Project deep dive

- Explain architecture decisions in your latest project
- Highlight scale, performance, and accessibility improvements
- Mention tradeoffs and what you would improve next

Round 4: Behavioral and ownership

- Conflict resolution story
- Deadline pressure story
- Learning from production bugs

Final 48-hour checklist

1. Prepare a 60 second introduction.
2. Revise your resume line by line.
3. Practice 2 timed mock interviews.
4. Keep 5 questions ready for interviewers.

Treat this kit as your pre-interview checklist and review it before each application cycle.
